## Service Bulletin

**SUBJECT: CIM CUBER SERVICE PARTS  
AIR FILTERS**

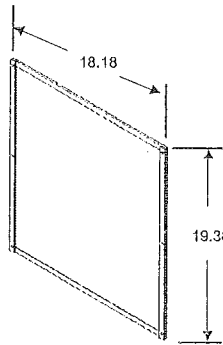

**Number: 2019-01  
Product: Cuber  
Date Issued: January 31, 2019  
From: Technical Service**

The CIM Air Cooled series now include a factory installed air filter beginning with Serial Number 19011280011837. The filters and installation instructions are model number specific per the list below. Clean the filter at least every 6 months to ensure unobstructed air flow.

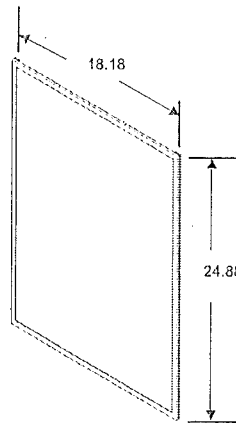

The air filter screens are made of durable UV protected polypropylene, and can be easily cleaned in place. As needed, depending on dirt load, simply brush debris off the filter with a broom/stiff brush or vacuum with shop vacuum, without any system downtime.

If necessary, due to greasy dirt build-up (i.e., in a restaurant setting), filter can also be removed, sprayed with mild detergent and back flushed in a sink or with a water hose.
